

OPAQUE WINTER COVER

LAKE

Perfectly clean water even in winter

OPAQUE WINTER COVER

LAKE

Cover available for in-ground pools of 6.00 x 14.00 m maximum.

+ FINISHES

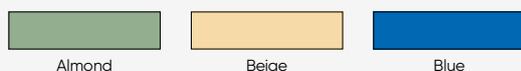

- A 580 g/m² fabric with UV and fungicide treatment.
- Rainwater drainage holes hidden by the flap ensure an efficient drainage and preserve the cover's aesthetic.
- 316 L grade double eyelets on PVC protection make the resistance to tension stronger and provide safer and more reliable attachment over time.
- Different types of anchors and tensions for integration in all environments.

+ OPACITY

- The opacity of the fabric maintain the water in the dark to prevent the photosynthesis and the growth of algae during the winter.
